

SEMINAIRE

20 février 2024 – 9h30

Faculté de médecine - Pôle recherche - Salle du conseil (RdC, Aile Est) - 1 place de verdun, Lille

Sujets : EthoVision, PhenoTyper et autres outils pour étudier le comportement animal

Organisation: Dr. Charlotte Laloux : PLBS/Plateforme LiiFE ; charlotte.laloux@univ-lille.fr

Dr. Jacques Prieur : Noldus Information Technology ; jacques.prieur@noldus.com

Automate your behavioral research with EthoVision XT

EthoVision XT is the most flexible and versatile system for highly accurate tracking, activity detection, and analysis of animal movement, activity, and behavior.

PhenoTyper 2: instrumented observation system

The PhenoTyper 2 is a system designed for 24/7 observation periods but can be customized for highly complex multimodal experiments (Cognition Wall, EEG and optogenetics).

Overview on other solutions to study animal behaviors

Noldus has many flexible tools that enable researchers to perform multimodal data integration and analysis to better understand relationships between variables and thus animal behavior.
